

Jarrett Bay 63

COURTESY OF JARRETT BAY BOATWORKS

The newest addition to the Jarrett Bay Boatworks family is this 63-foot custom project. Representing the next evolution in design from Jarrett Bay, the 63 possesses a more modern profile than the traditional Carolina-style designs for which the builder is known. An additional rounded edge on the front and sides of the superstructure between the flybridge and the main deck and a wraparound windshield add distinctive styling.

The expansive teak cockpit is ready for fishing action with a mezzanine level bait prep area, tackle drawers, optional transom livewell or fish box, and 40-gallon ice storage, while still leaving plenty of room for an optional fighting

Specifications

chair or rocket launcher.

The spacious interior accommodations can be tailored to each owner's requests. The basic layout features a settee to port with the galley forward opposite the dinette. Undercounter built-in refrigerator and freezer units keep the galley open to the saloon while allowing ample pantry space. An entertainment center is opposite the settee. The companionway leads forward with a day head immediately to starboard. Opposite is the master stateroom with queen-size berth and ensuite head. An ensuite guest stateroom with V-berth is located in the bow with a third stateroom just aft on the starboard side.
