JARRETT BAY

The Jarrett Bay 64 represents the next best evolution in custom sportfish design. This latest addition to the family possesses a modern, streamlined take on its traditional custom Carolina design. An additional rounded corner radius built into the side and front panels of the cabin and bridge is combined with a sleek profile and rakish front to make for one impressive head-turner.

Spacious guest and crew quarters can be tailored on the Jarrett Bay 64 to have an unprecedented amount of stowage space for rods and tackle. An expansive teak cockpit, generous sleeping accommodations, and ample space for redundant systems make this an ideal boat for traveling to remote, fish-filled waters.

The Jarrett Bay 64's 1,825-hp Caterpillar C32 ACERTs generate a swift 36.5-knot cruise and 42-knot top end. Whether the fishing grounds are a three-hour or three-day venture away, this amazing ride will get you there fast and efficiently.

In the highly competitive custom-sportfish market, Jarrett Bay's 20 years invested in building 50-foot-plus hulls have greatly benefited the industry as a whole and produced some of the finest boats to be found on the water. The Jarrett Bay 64 not only continues this tradition, it raises the bar for those to follow.

Length overall.....	64'0"	Fuel capacity.....	2,000 gal.
Beam.....	18'6"	Water capacity.....	250 gal.
