

# Jarrett Bay 34 Walk-Around Express

**T**he Jarrett Bay 34 Walk-Around Express raises the bar in ride, performance and layout. Molded from cored-composite fiberglass, the 34 is offered at a price competitive with

production boats similar in size.

A scaled version of their big boat hulls, the Jarrett Bay 34 features a fine entry, with full sections above the waterline, lots of displacement carried in the convexity amidships, and then tapers to moderate deadrise aft. This symphony of shapes results in your reaching plane easily and rushing to a cruising speed of 28-knots with authority. Since the engines can be completely tilted clear of the water, the boat can access shallow-water fishing grounds, or your favorite sandbar, and alleviate worries about corrosion while she's tied-up at the dock.

The Jarrett Bay 34 is equipped with many of the fishing features you'd expect to find aboard one of their larger boats. And since it's a Jarrett Bay, you

can have many of your custom requests built in. With all of the flare and half the wait of a custom build, the Jarrett Bay 34' Walk-Around Express marks the ultimate marriage of classic Carolina styling and performance with advanced composite construction processes.
